1st Edition Printed in Taiwan October 1999

Product warranty

Advantech warrants to you, the original purchaser, that each of its products will be free from defects in materials and workmanship for one year from the date of purchase.

This warranty does not apply to any products that have been repaired or altered by persons other than repair personnel authorized by Advantech, or which have been subject to misuse, abuse, accident or improper installation. Advantech assumes no liability under the terms of this warranty as a consequence of such events.

Because of Advantech high quality-control standards and rigorous testing, most of our customers never need to use our repair service. If an Advantech product is defective, it will be repaired or replaced at no charge during the warranty period. For out-of-warranty repairs, you will be billed according to the cost of replacement materials, service time and freight. Please consult your dealer for more details. If you think you have a defective product, follow these steps:

1. Collect all the information about the problem encountered. (For example, CPU speed, Advantech products used, other hardware and software used, etc.) Note anything abnormal and list any on- screen messages you get when the problem occurs.
2. Call your dealer and describe the problem. Please have your manual, product, and any helpful information readily available.
3. If your product is diagnosed as defective, obtain an RMA (return merchandize authorization) number from your dealer. This allows us to process your return more quickly.
4. Carefully pack the defective product, a fully-completed Repair and Replacement Order Card and a photocopy proof of purchase date (such as your sales receipt) in a shippable container. A product returned without proof of the purchase date is not eligible for warranty service.
5. Write the RMA number visibly on the outside of the package and ship it prepaid to your dealer.

Packing list

Before installing your board, make sure that the following materials have been received:

- 1 CPC-2520 VGA/LCD module for mini biscuit PC
- 2 floppy disks (or one CD-ROM) including SVGA utility programs and drivers for Windows 95/98/NT
- 1 warranty certificate
- This user's manual

If any of these items are missing or damaged, contact your distributor or sales representative immediately.

Technical support and sales assistance

If you have any technical questions about the CPC-2520 or any other Advantech products, please visit our support website at:

CHAPTER 1

General Information

This chapter provides background information for the CPC-2520. Sections include:

- Card specifications
- Board layout

1.1 Introduction

The CPC-2520 is an extension VGA/LCD module for the CPC-2245 mini biscuit PC. The CPC-2520 uses a C&T 69000 chipset for its PCI/SVGA controller. It supports many popular LCD, EL, and gas plasma flat panel displays and conventional analog CRT monitors. The 69000 VGA BIOS supports mono-chrome LCD, EL, color TFT and STN LCD flat panel displays. In addition, it also supports interlaced and non-interlaced analog monitors (color and mono-chrome VGA) in high-resolution modes while maintaining complete IBM VGA compatibility. Digital monitors (i.e. MDA, CGA, and EGA) are NOT supported. Multiple frequency (multi-sync) monitors are handled as if they were analog monitors.

With on-board 2 MB display memory, the VGA controller can drive CRT displays or color panel displays with resolutions up to 1024 x 768 at 64 K colors.

CRT and panel displays can be used simultaneously. The CPC-2520 can be set in one of three configurations: on a CRT, on a flat panel display, or on both simultaneously. The system is initially set to simultaneous display mode.

1.2 Specifications

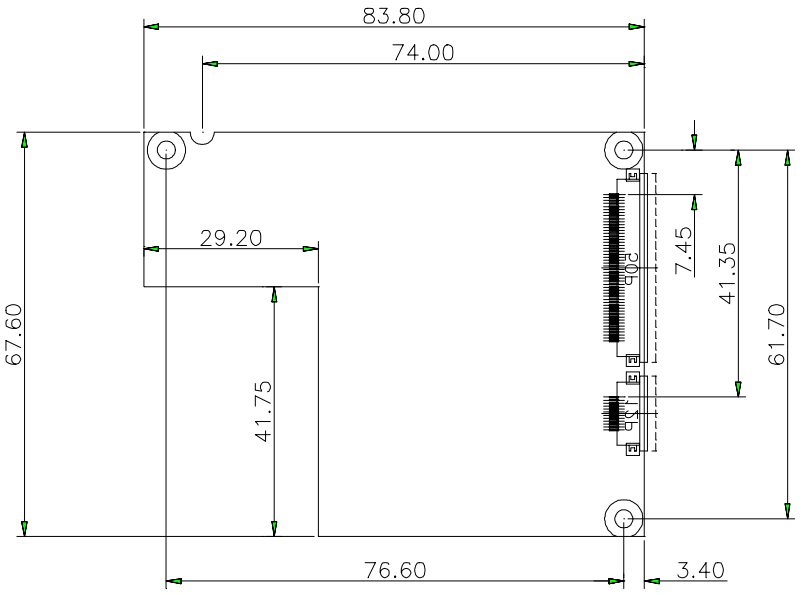
General

- Flat panel VGA interface
- **Chipset:** C&T 69000 VGA controller with Windows accelerator
- **Display memory:** 2 MB SDRAM in built-in chip
- **Display output:**
  50-pin FPC connector for flat panel interface
  12-pin FPC connector for VGA interface
- **Display type:** Supports CRT and flat panel (TFT, DSTN, and mono) displays. Can display both CRT and flat panel simultaneously
- **Resolution:** 640 x 480 @ 16 M colors
  800 x 600 @ 16 M colors
  1024 x 768 @ 64 K colors

Mechanical and environmental

- **Power supply voltage:** +5 V (4.75 V ~ 5.25 V)
- **Max. power requirements:** +5 V @ 0.8 A
- **Operating temperature:** 0 ~ 60° C (32 ~ 140° F)
- **Board size:** 68 x 100 mm (2.7" x 3.9")
- **Weight:** 0.05 kg (0.11 lb)

1.3 Board layout: dimensions



CHAPTER 2

Installation

This chapter explains the setup procedures of CPC-2520 hardware, including instructions on setting jumpers andconnecting peripherals, switches andindicators. Be sure to read all safety precautions before you begin the installation procedure.

2.1 Jumpers and connectors

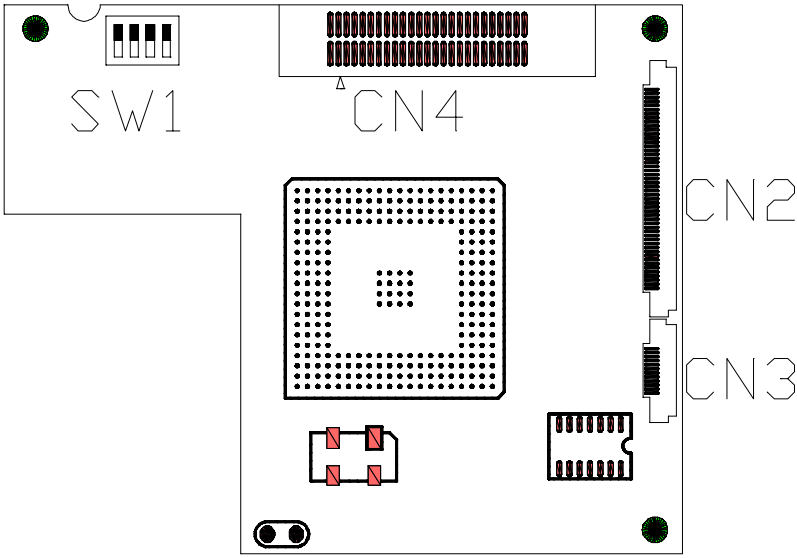
On-board connectors link to external devices such as hard disk drives, keyboards, or floppy drives, etc. In addition, the board has jumpers for configuring your board for specific applications.

The table below lists the function of each of the board's jumpers and connectors. Later sections in this chapter give detailed information on each jumper setting, and gives instructions for connecting external devices to your card.

Table 2-1: Jumpers and connectors

Number	Function
SW1	LCD panel type setting
CN1	Reserved for VGA testing
CN2	LCD display connector
CN3	VGA display connector
CN4	PCI bus

2.2 Board layout: jumper/connector locations



2.3 Safety precautions

Warning!

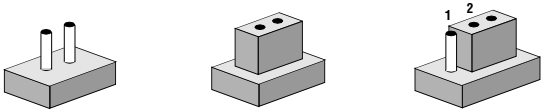
Always completely disconnect the power cord from your chassis whenever you are working on it. Do not make connections while the power is on because sensitive electronic components can be damaged by the sudden rush of power. Only experienced electronics personnel should open the PC chassis.

Caution!

Always ground yourself to remove any static charge before touching the CPU card. Modern electronic devices are very sensitive to static electric charges. Use a grounding wrist strap at all times. Place all electronic components on a static-dissipative surface or in a static-shielded bag when they are not in the chassis.

2.4 Jumper settings

You configure your card to match the needs of your application by setting jumpers. A jumper is the simplest kind of electric switch. It consists of two metal pins and a small metal clip (often protected by a plastic cover) that slides over the pins to connect them. To close a jumper you connect the pins with the clip. To open a jumper you remove the clip. Sometimes a jumper will have three pins, labeled 1, 2 and 3. In this case you would connect either pins 1 and 2 or 2 and 3.



Open **Closed** **Closed 2-3**

A pair of needle-nose pliers may be helpful when working with jumpers. If you have any doubts about the best hardware configuration for your application, contact your local distributor or sales representatives before you make any changes.

2.5 LCD panel select (SW1)

Panel #	SW1				Panel Type
	A	B	C	D	
1	ON	ON	ON	ON	1024 x 768 DSTN
2	OFF	ON	ON	ON	1280 x 1024 TFT
3	ON	OFF	ON	ON	640 x 480 DSTN
4	OFF	OFF	ON	ON	800 x 600 DST
5	ON	ON	OFF	ON	640 x 480 Sharp TFT
6	OFF	ON	OFF	ON	640 x 480 18-bit TFT
7	ON	OFF	OFF	ON	1024 x 768 36-bit TFT
8	OFF	OFF	OFF	ON	800 x 600 TFT
9	ON	ON	ON	OFF	800 x 600 TFT (large BIOS only)
10	OFF	ON	ON	OFF	800 x 600 TFT (large BIOS only)
11	ON	OFF	ON	OFF	800 x 600 DSTN (large BIOS only)
12	OFF	OFF	ON	OFF	800 x 600 DSTN (large BIOS only)
13	ON	ON	OFF	OFF	1024 x 768 TFT (large BIOS only)
14	OFF	ON	OFF	OFF	1280 x 1024 DSTN (large BIOS only)
15	ON	OFF	OFF	OFF	1024 x 600 DSTN (large BIOS only)
16	OFF	OFF	OFF	OFF	1024 x 600 TFT (large BIOS only)

2.6 Display connectors (CN2, CN3)

The CPC-2520 PCI SVGA interface can drive conventional CRT display and is capable of driving a wide range of flat display, including electroluminescent (EL), gas plasma, passive LCD, and active LCD displays. The card has two connectors to support these display, one for CRT VGA monitor and one for flat panel displays.

2.7 LCD display connector (CN2)

LCD display connector on CPC-2520 is a 50-pin FPC connector. The CPC-2520 supports up to 36 bits LCD panel.

Table 2-2: LCD display connector (CN2)

Pin	Signal	Pin	Signal
1	ENAVEE	26	P15
2	LP	27	P16

25	P14	50	GND

Note: The model number of the CN2 socket is IL-FPR-50S-HF (JAE Co., Ltd.)

2.8 VGA display connector (CN3)

VGA display connector on CPC-2520 is a 12-pin FPC connector, these VGA signals can be connected to client's system board through a FPC cable. Client can design this cable by referring to Cable layout diagram in chapter of design guide.

Table 2-3: VGA display connector (CN3)

Pin	Signal
1	GND
2	+5V
3	+5V
4	GND

CHAPTER 3

Software Configuration

This chapter details the software configuration information. It shows you how to configure the card to match your application requirements.

Sections include:

- Introduction
- Connections for five standard LCDs

3.1 Introduction

The CPC-2520 VGA BIOS are located in a 128 Kbyte, 32-pin (JEDEC spec.) Flash ROM device, designated U1. To set different types of LCD panels please choose Panel type from the DIP Switch.

3.2 Connections for five standard LCDs

Connections to Sharp LM64183P, LM64P89 (640 x 480 DSTN MONO LCD)

Table 3-1: Connections to Sharp LM64183P, LM64P89

CHAPTER 4

PCI SVGA Setup

- Introduction
- Installation of SVGA driver for
  - Windows 3.1
  - Windows 95
  - Windows NT
- Further information

4.1 Introduction

The CPC-2520 has an on-board PCI flat panel/VGA interface. The specifications and features are described as follows:

4.1.1 Chipset

The CPC-2520 uses a C&T 69000/69030 chipset for its PCI/SVGA controller. It supports many popular LCD, EL, and gas plasma flat panel displays and conventional analog CRT monitors. The 69000/69030 VGA BIOS supports monochrome LCD, EL, color TFT and STN LCD flat panel displays. In addition, it also supports interlaced and non-interlaced analog monitors (color and mono-chrome VGA) in high-resolution modes while maintaining complete IBM VGA compatibility. Digital monitors (i.e. MDA, CGA, and EGA) are NOT supported. Multiple frequency (multi-sync) monitors are handled as if they were analog monitors.

4.1.2 Display memory

With on-board 2 MB display memory, the VGA controller can drive CRT displays or color panel displays with resolutions up to 1024 x 768 at 64 K colors. The display memory can be expanded to 4 MB for true-color resolution of 1024 x 768 with C&T 69030.

4.1.3 Display types

CRT and panel displays can be used simultaneously. The CPC-2520 can be set in one of three configurations: on a CRT, on a flat panel display, or on both simultaneously. The system is initially set to simultaneous display mode. The utility disks includes three *.COM files in the subdirectory Utility\vga\ which can be used to configure the display. In order to use these configuration programs, type the file name and path at the DOS prompt.

CT.COM: Enables CRT display only

FP.COM: Enables panel display only

SM.COM: Enables both displays simultaneously

4.2 Installation of SVGA driver

Complete the following steps to install the SVGA driver. Follow the procedures in the flow chart that apply to the operating system that you are using within your CPC-2520.

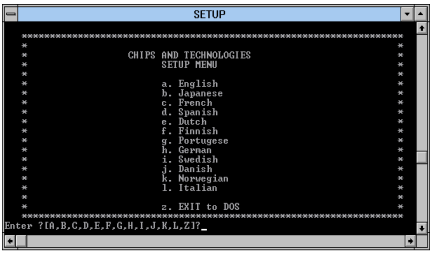
Important: The following windows illustrations are examples only. You must follow the flow chart instructions and pay attention to the instructions which then appear on your screen.

Note: <Enter> means pressing the "Enter" key on the keyboard.

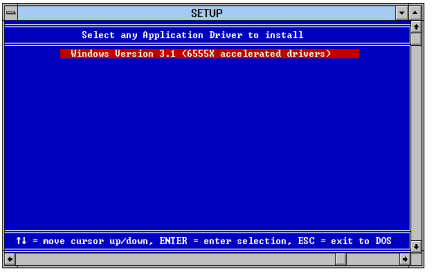
4.2.1 Installation for Windows 3.1

1. a. Insert the utility disk into the floppy disk drive.
   b. Select "File" in Program Manager.
   c. Click "Run" and type: "A:\VGA\Win31\Setup.exe".

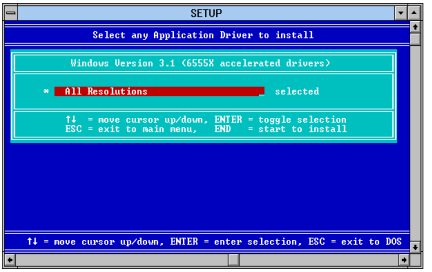
2. a. Choose the language you want to use during installation.



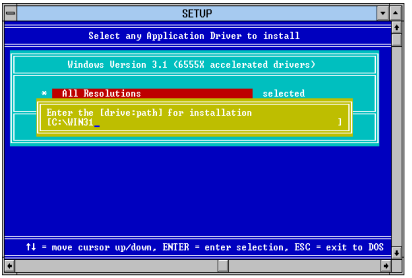
3. a. Select the highlighted item.
   b. Press "ENTER".



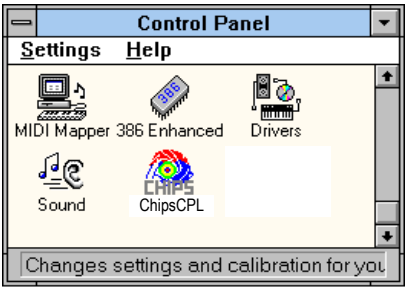
4. a. Press "ENTER" to install all resolutions.



5. a. Type the path of the operating system.

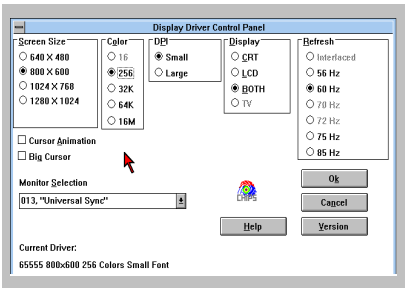


6. a. When installation is completed, reboot the system.
   b. You will see the "ChipsCPL" icon in the control panel.



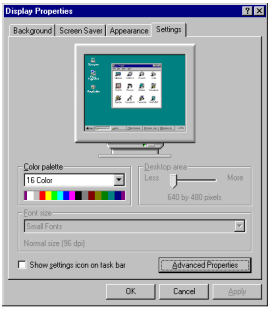
7. a. Double click "ChipsCPL".
   b. Adjust screen size, color and refresh rate to your preferences.

END

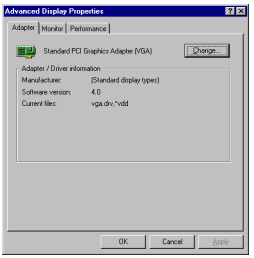


4.2.2 Installation for Windows 95

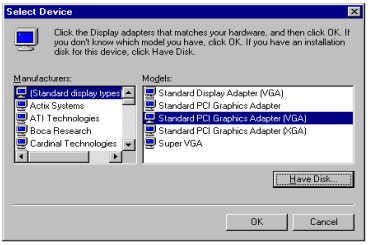
1. a. Select "Start", "Settings", "Control Panel", "Display", "Settings".
   b. Press "Advanced Properties".



2. a. Choose the "Adapter" label.
   b. Press the "Change..." button.



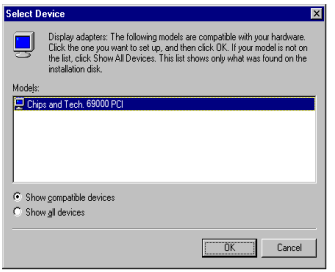
3. a. Press the "Have Disk" button.



4. a. Insert the utility disk into the floppy disk drive.
   b. Type "A:\VGA\Win95\Setup\exe".
   c. Press "OK".

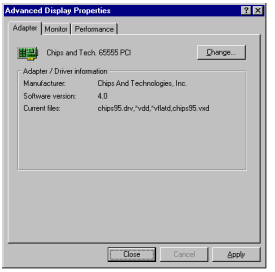
5.

a. Select the highlighted item.
b. Click the "OK" button.



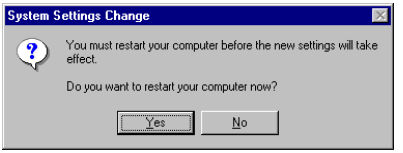
6.

a. C&T69000/69030 appears in the adapter label.
b. Click the "Apply" button.



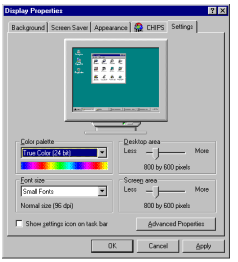
7.

a. Press "Yes" to reboot.



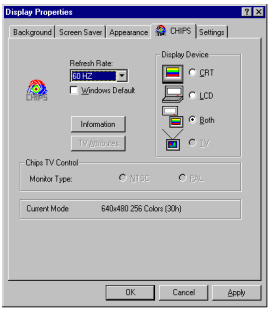
8.

a. Repeat Step 1 on the previous page of this manual. The "CHIPS" label appears in "Display".
b. Adjust resolution and color.



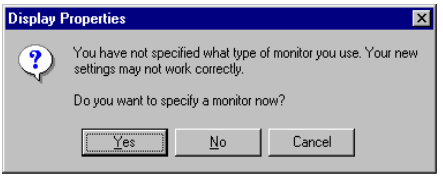
9.

a. Click the "CHIPS" label.
b. Adjust the refresh rate and display type.
c. Press "OK" to exit.



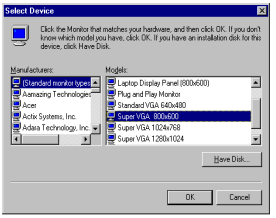
10.

a. Press "Yes" to set the monitor type.



11.

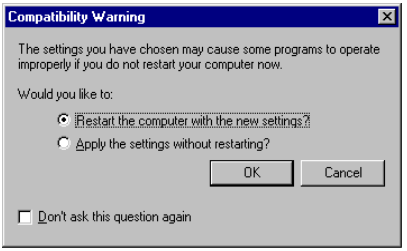
a. Select "Standard", "Super VGA 800 x 600", or "XGA".
b. Press the "OK" button.



12.

a. Choose "Restart" to reboot.

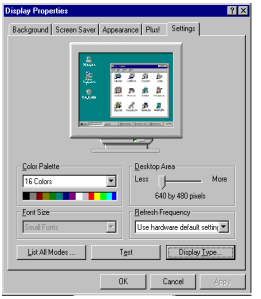
END



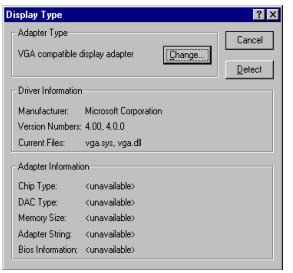
4.2.3 Installation for Windows NT

1. a. Select "Start", "Settings", "Control Panel".
   b. Double click the "Display" icon.

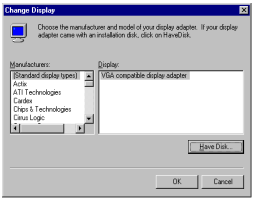
2. a. Choose the "Settings" label.
   b. Press the "Display Type" button.



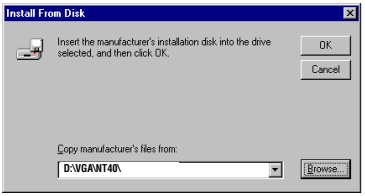
3. a. Press the "Change..." button.



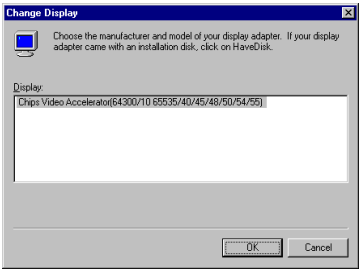
4. a. Click the "Have Disk..." button.



5. a. Insert the utility disc into the floppy disk drive.
   b. Type "A:\VGA\NT40\" in the blank.
   c. Press the "OK" button.

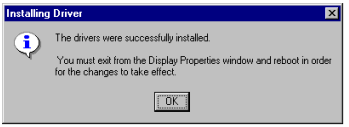


6. a. Select the highlighted item.
   b. Press the "OK" button.



7. a. Press "Yes" to proceed.

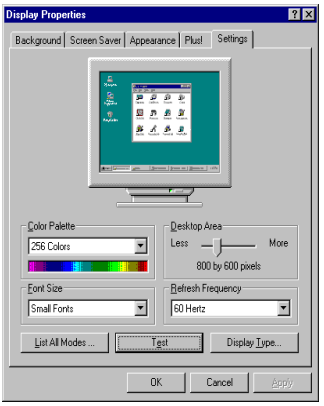
8. a. Press "OK" to reboot.



9.

a. Repeat Step 1 in this manual, to select the "Settings" label.
b. Adjust resolution and color.
c. Click "Test" to see the result.
d. Click "OK" to save the settings.

END



4.3 Further information

For further information about PCI/SVGA installation in your CPC-2520, including driver updates, troubleshooting guides and FAQ lists, visit the following web resources:

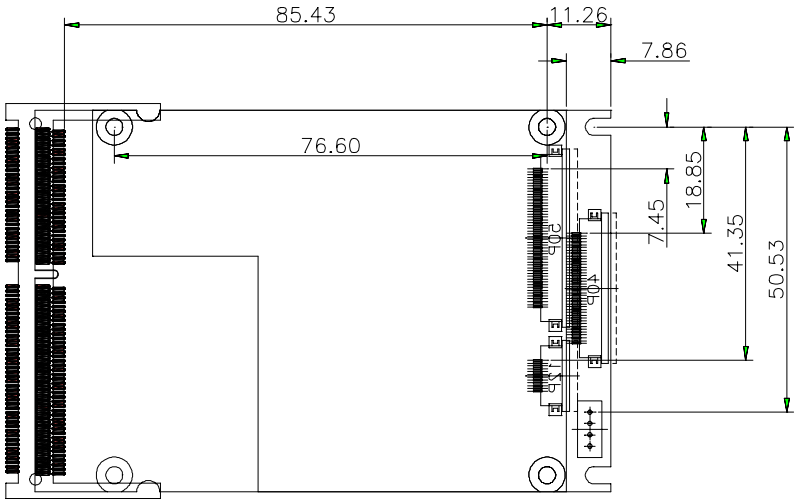
CHAPTER 5

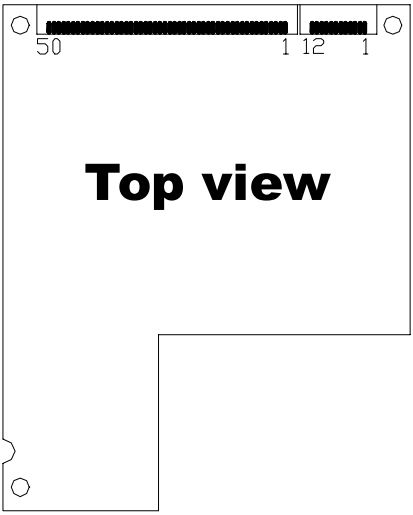
Board Diagrams

This chapter contains diagrams of the CPC-2245/CPC-2520 carrier boards It includes the FPC cable, SODIMM socket, and mechanical diagrams.

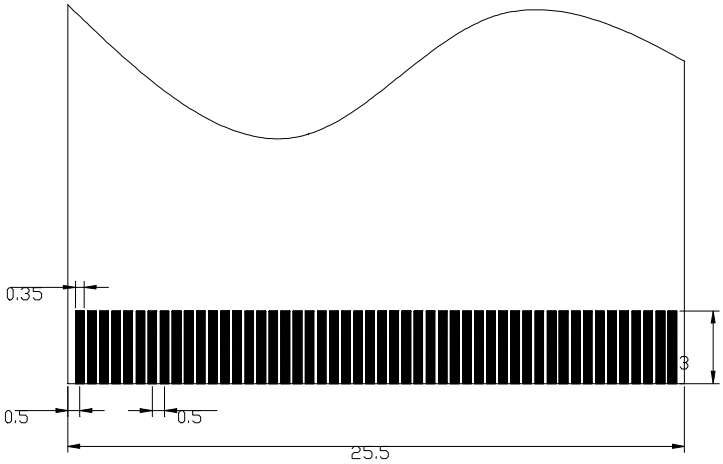
5.1 PCB layout: SODIMM/screw hole locations



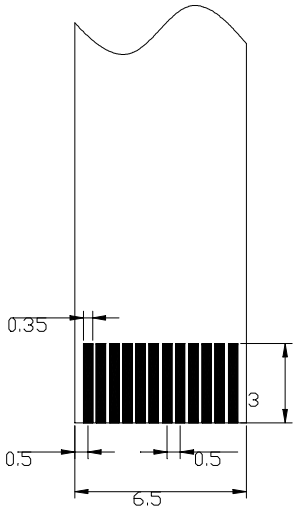
5.2 Board layout: connectors (top view)



5.3 FPC/FFC layout: CN2: 50-pin FPC connector

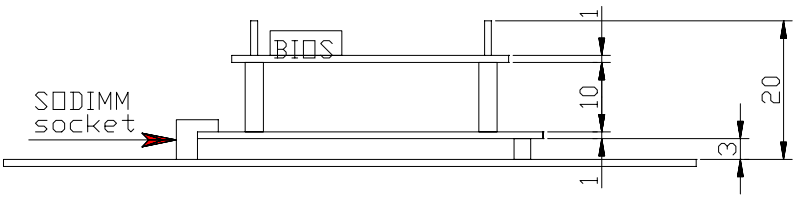


5.4 FPC/FFC cable layout: CN3: 12-pin FPC connector



5.5 Height limitations: side view

At least 3 mm clearance is needed between the carrier board's surface and the bottom of the CPC-2245. Some suggested suppliers are listed below.



5.6 Component suppliers

Table 5-1: Component suppliers

Location	Model number	Supplier
CN2 50-pin FPC connector	IL-FPR-50S-HF	JAE
CN3 12-pin FPC connector	IL-FPR-12S-HF	JAE
CN4 50-pin FPC connector	145077050112861	ELCO
