Introduction

Conceived as a powerful rackmount Internet security platform, the FWA-3620 is specifically designed for Internet secure connectivity. Designed with the Intel Pentium III and Celeron processor, it provides high performance and meets the requirements of Internet security applications. The system supports CompactFlash for use in installing OS and Internet security applications. This avoids service disruption caused by hard disk mechanical/magnetic failures. In addition, the FWA-3620 can support system memory up to 512 MB SDRAM. Both CompactFlash and SDRAM can be accessed and replaced for software upgrades through an easily removable cover. Designed with the Plug-and-Serve concept in mind, the FWA-3620 offers three 10/100 Mbps auto-sensing Fast Ethernet ports in the front panel. There are two LED Indicators which monitor power and HDD activities. For easy access, the front panel has a 9-pin, RS-232 serial port for local system management, maintenance and diagnostics. The FWA-3620 has a place reserved for an optional 3.5" IDE HDD and dual PCI expansion slots. It is FCC and CE compliant.
