## Introduction

The RS-200-RP series are compact 2U rackmount servers that provide flexible and suitable solutions for ISPs, telecommunications applications, Industrial Automation, VOD and space constrained data centers. The servers are comprised of Advantech's in-house designed server-engineered motherboards, which supports either dual Intel Xeon processors 2.8 GHz or higher CPU speeds of up to 16 GB of registered, ECC, DDR-266 SDRAM, 400/533 MHz FSB (RS-200-RP support DDR-200 SDRAM, 400 MHz FSB). The servers, with ServerWorks GC-LE chipset, supports PCI-X bus at 64-bit/66,100,133 MHz, and comes with three PCI-X expansion slots. Designed to be easily configurable, the servers

includes six hot-swappable SCSI storage devices, compact floppy disk drive, and CD-ROM drives. Complete I/O functions include: dual Broadcom BCM5701/3 Gigabit Ethernet controllers, with support for 10Base-T, 100Base-TX and 1000-Base-T through RJ-45 connectors. The system cooling fans provide superior ventilation and thermal performance. The front panel LED indicators and alarm system detects fan speed, chassis temperature, system voltage, HDD and power supply failure that allows remote monitoring through optional SNMP MIB-based management software.
