Introduction

The RS-200-RT series consists of a 2U compact, rackmount e-Server that provides flexible solutions suitable for ISPs, telecommunications, VOD and space constrained data centers. Designed to provide high capacity and reliability, the RS-200-RT series has six hot-swappable SCSI drive bays with hardware RAID module. The servers include Advantech's in-house designed server-engineered motherboards specially designed

for high performance. The RS-200-RT series has complete I/O functions including dual Intel 82559 Fast Ethernet controllers with support for 10Base-T and 100Base-TX through RJ-45 connectors. The cooling fans provide superior ventilation and thermal performance.
