Rackmount Internet Security Platform with 3 Ethernet Ports

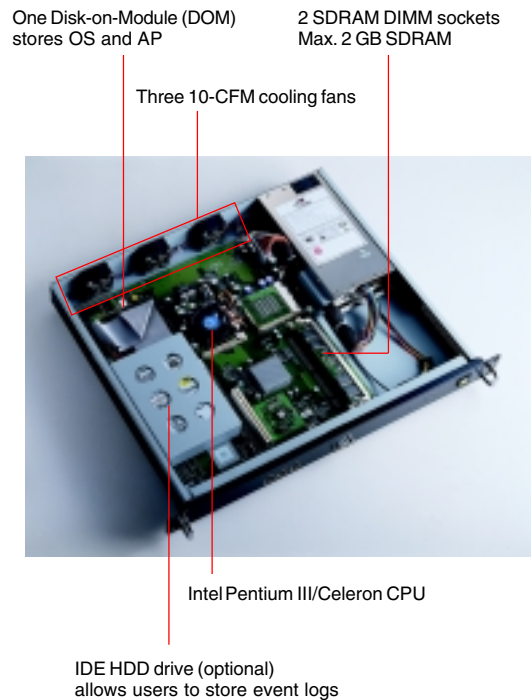

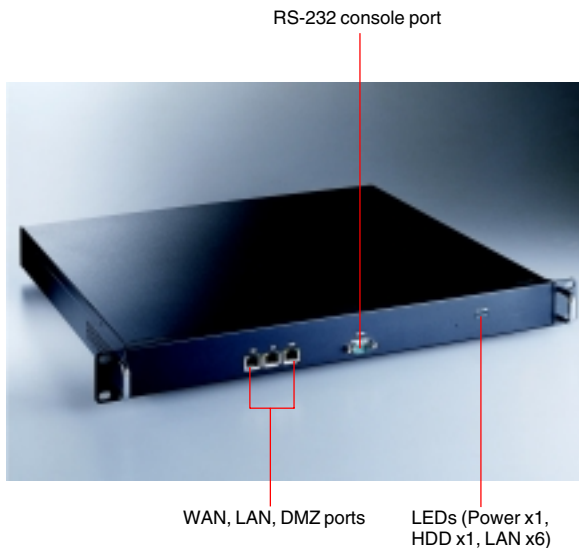

Features

- Internet security platform for enterprise
- Compact Ultra-slim 1U rackmount housing
- Intel® Pentium® III processor up to 866 MHz
- Max. 2 GB SDRAM
- One IDE HDD drive space and DOM option
- Triple Fast Ethernet for WAN, LAN and DMZ

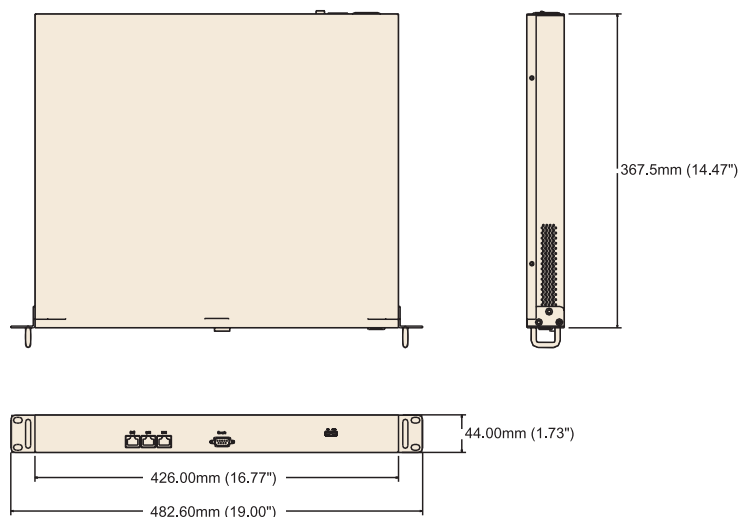

Introduction

The FWA-3010 is a 1U rackmount Firewall/VPN platform suitable for enterprise users. The platform can provide one Disk-on-Module (DOM) to store OS and AP. In addition, an optional IDE HDD allows users to store event logs in the local site. The design also includes 3 front access network ports (Fast Ethernet ports for WAN, LAN and DMZ), and one

RS-232 console port, which is designed to set the parameters of application software, local management, maintenance and diagnostics. There are eight LED indicators that show the status of power, HDD and 3 LANs. With a ServerWorks chipset server board, this 1U appliance can satisfy the demands for today's enterprise firewall security needs.
