

PPC-L126 Expansion Kit Installation Guide

1.1 Packing List

- PISA Riser Card
- Metal Rear Cover
- Metal frame
- Screw Pack

1.2 Assemble the Expansion Kit

1. Remove the rear panel, then detach the riser card.
2. Put the rear panel back and screw it, then insert the PISA riser card through the opening of the rear panel into the panel PC.
3. Put the metal frame on the rear panel, then screw four screws to fix it as well as screw two screws to fix the PISA riser card on the metal frame.
4. In addition, insert a half-size of the expansion card on either the PCI or ISA on your optional.
5. Finally, screw the metal rear cover with four screws on the metal frame.
