

RMD-1150

1U Rackmount LCD Display with KVM Switch/Keyboard/Touch Pad

Features

- 15" active TFT LCD display with RGB analog output
- Supports 8 IBM PC-compatible computer ports
- Auto Scan from OSD display
- Hot-key functions allow easy computer access
- Supports both PS/2 and serial mouse
- High VGA resolution 1600 x 1200 for external console
- Selectable user timeout
- EIA 19" rackmount and rugged slide rail
- Operating system independent, transparent to all applications
- Password security locks computer from unauthorized access

Introduction

RMD consists of a keyboard, 15" TFT LCD display, and touch pad. You can control and access multiple computers from a central user console. It saves hundreds of dollars in equipment, space and power costs. There is no need to have additional peripherals for each computer. The administrator can access multiple computers from one location

instead of having to move from one computer to another. Installation is as simple as connecting cables between the RMD switch and your computers. This is ideal for an Internet data center, server room, testing lab, and network-operating center where multiple computers are required.

Specifications and Ordering Information

Part Number	RMD-1150F-8	RMD-1150KM
LCD Display	15" XGA TFT	15" XGA TFT
LCD Resolution	1024 x 768	1024 x 768
Computer Port Number	8	1
Cascade Control PC Number	up to 64	N/A
On-screen Display (OSD)	Yes	
Front Panel Button control	Yes	
Hot Plug-and-play	Yes	
Hot-key Control	Yes	N/A
PC Environment	IBM-Compatible
